# 8A CONTROLLER FOR 8 ZONE LED REMOTE

SKU: SA-CTRL-8A-RGB

## Product Description

Solid Apollo's controller for the 8 Zone LED Remote is now available in 8 amps which means more power for your buck. At 24V DC, you can now power up to a maximum of 192W per channel, a total of 768W of Color Changing RGB LED Strip Lights. This dims smoothly from 0-100%, has a soft on/off feature, and remembers last setting when unplugged or power is lost.

The controller is easy to mount to a variety of hard surfaces and slim enough to hide out of sight. A learning key button easily pairs with RGB-W remotes to work with any LED project. Just one push of the button begins the pairing process. Add as many optional RGB-W controllers as you wish to create up to 8 different control zones. Each zone can have an endless number of controllers which will let you expand any installation from a small size to a colossal project. The 8A Controller for 8 Zone LED Remote is UL Listed ensuring the safety and durability for the lifetime of the unit.
