DATA SHEET
120V AC 8 ZONE WIRELESS WATERPROOF RGB CONTROLLER/REMOTE
SKU: LT-RGB-DRLS-RF
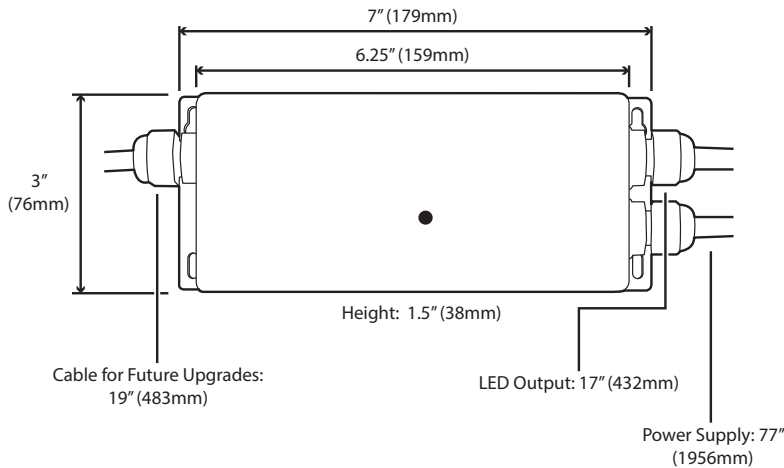

Product Description

Solid Apollo's 120V AC 8 Zone Wireless Waterproof RGB Controller/Remote is designed to be used with RGB LED lighting products that work at line voltage of 120V AC like our Driverless RGB LED strips and our RGB Neon LED. This state-of-the-art driverless controller is full of incredible and exciting feature never seen before in line voltage products. The 120V AC 8 Zone Wireless Waterproof RGB Controller/Remote lets you individually control up to eight different zones independently or in a group and is able to fine tune a selected color, adjust brightness levels, and apply 1 of 10 color changing programs throughout all zones or in a group. This set includes one wireless remote and one controller that will let you manage one zone. If you wish to manage more than one zone, you only need to add additional controllers that will enable you to independently control up to 8 different zones.

• Easily control up to 8 different zones individually or in group.
• Controls 3 Channels: RGB (Red, Green, and Blue)
• Color wheel with SenseControl ™
• Brightness levels can be adjusted for each individual color/zone
• 10 Color Changing Programs with chase effects and fading effects through all zones
• On/Off switch of individual zones or all RGB LED lights

• Controller has waterproof casing for indoor/outdoor use, IP rating of 67
• High Voltage applications (100-240VAC)
• Wireless range of up to 100ft
• Memory Function
• Intelligent Channel Assignment

Quick Spec.

• **Dimmable**	Yes, by remote	• **Weight:**	2.35 lb	• **RGB Channels**	3
• **Input Voltage:**	Controller: 120–240VAC	• **Dimensions:**	Remote: 5.2"x1.7"x0.77"	• **Product Color:**	White
• **Max Amp:**	Controller: 5A		Controller: 7"x3"x1.5"	• **Working Temp:**	-4 - 122F
• **Warranty:**	3 Years	• **IP Rating:**	IP67	• **Certifications:**	CE, RoHs
