

GECKO WIRELESS ONE ZONE LED DIMMER WALL SWITCH/CONTROLLER

SKU: SA-CTRL-GECKO-ONE-WIRELESS

Product Description

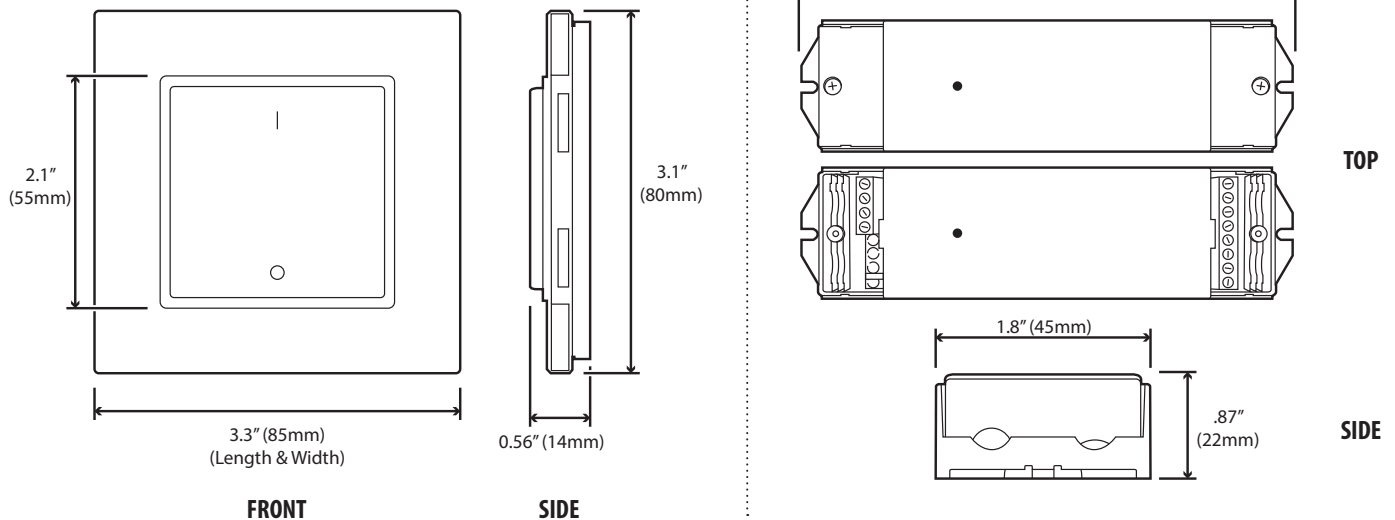

The Gecko Wireless One Zone LED Dimmer Wall Switch/Controller has been designed to bring light control easily. No wires or switch box locations are needed, just stick or mount the Gecko to any flat location such as walls or cabinets. The simple modern design and elegant Ivory White surface compliments a variety of LED projects. The Gecko runs on a single internal 3V battery (included) and can be paired wirelessly with any single color LED light. The wireless design saves time and energy by requiring no cabling or installation to pair the Gecko. To activate the soft on/off brightness control, the off button can be held down to decrease brightness of one LED zone. The on button works the same way to increase brightness. Strong and durable 3M double sided tape is included with the unit.

- UL Listed - E493882
- No Wires, Stick or Mount to Any Flat Surface
- Wireless Control of Any LED Lights
- Simple Modern Design
- Elegant Ivory White Glass Surface
- 50 Foot Wireless Range
